## DA-LEE PREMIUM ROAD ENHANCEMENT

Acknowledged as the best product on the market for base stabilization projects and dust suppression. Da-Lee Virgin Oil is a premium road enhancement product designed to coat and bind aggregate matter in place, giving the roadway the stability of a paved surface with the maintenance level of a gravel road at a fraction of the cost.

## BENEFITS OF SURFACE TREATING

- ▶ *Hard, weather sealed, smooth riding surface free of hazardous dust.*
- ▶ *Provides a surface that acts like pavement, yet can be reworked and shaped using existing equipment and materials, i.e. a grader.*
- ▶ *Low annual average costs due to minimal gravel replacement costs, minimal grading expenses (once or twice a year) and reduced washout repair costs.*
- ▶ *Public approval – More cost effective than tar & chip or paving.*

## BENEFITS USING DA-LEE VIRGIN OIL

- ▶ *Remains effective under the driest of conditions*
- ▶ *Extremely effective on sandy road bases and heavy traffic roadways*
- ▶ *Single applications last all season*
- ▶ *Minimal continued maintenance on the treated road*

## PREMIUM DUST SUPPRESSANT • MINIMAL MAINTENANCE HIGHLY EFFECTIVE

*"We have very sandy and unruly roads in our Township where nothing else works except the Virgin Oil. The heavy traffic packs it down to form a hard surface which holds up very well in our industrial and agricultural areas."* - Jerry Ball, Township of Oro-Medonte

*"Best thing about the Virgin Oil is that once it's sprayed, we don't have to worry about the roadway any longer. The road stays tightly packed through the entire season. The first time we used it was the first season that I didn't have to handle any residential complaints."* - Joe Coleman, Bradford West Gwillimbury
