DA-LEE MOBILE ROCK SALT MIXING

Da-Lee can effectively blend salt to any specification with our state of the art pugmill operation. Da-Lee's Salt Mixer is a large, mobile unit dedicated to treating rock salt. This premium treated rock salt product is used by municipalities and winter maintenance contractors to keep roads and paved areas free of snow and ice. The salt is treated with our Kinetic liquid blend, consisting of 30% to 35% LIQUIDOW™ Calcium Chloride and a viscosity enhancing organic additive.

BENEFITS OF BLENDING WITH DA-LEE

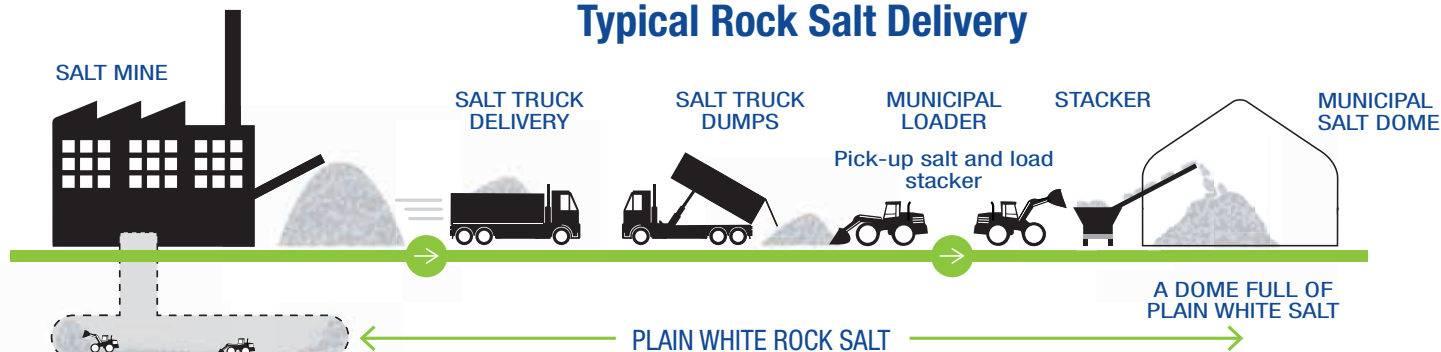

- ▶ Custom blends using the most effective liquids
- ▶ Blend at location of your choice
- ▶ Fresh blend for optimal results
- ▶ Eliminates need for onboard pre-wetting equipment and liquid storage
- ▶ Easy delivery and set up

BENEFITS OF KINETIC TREATED SALT

- ▶ Reduce total salt usage by 20-30% over plain white salt
- ▶ Reduce bounce and scatter
- ▶ Begins brining process immediately for faster melting
- ▶ Reduces corrosion with less chlorides for the environment
- ▶ Works in colder temperatures when compared to plain white salt
- ▶ Lasts longer due to residual benefits (tackiness)
