

SWITCH TO PROTEK® AND REDUCE YOUR SALT USAGE BY 25% AND MORE!

This winter there is more pressure than ever to increase your ice melt performance while maintenance professionals tighten their budgets. With environmental, cost, and safety pressures growing, PROTEK® DEICER is the ideal solution! Treated with an engineered solution containing unique natural fiber, PROTEK® enhances performance and minimizing environmental impact. PROTEK® melts faster and lasts longer while reducing your costs and the damaging effects of salt.

MELT MORE + SPEND LESS

- **PROTEK®** Performance Deicer gets you to a safe surface faster and lasts longer.
- Much more effective at lower temperatures (below -20° C).
- Resistance to wind and bounce, **PROTEK®** stays where you put it reducing need for heavy applications.
- Less product applied means fewer trips back to the pile, saving fuel, equipment wear and labour

AVAILABILITY

- Sold ready to use in **Bulk, 1000 kg or 25 kg bags.**
- **PROTEK®** Performance Deicer is non-caking and does not clump or clog your auger or spreaders.
- Engineered formulation provides rheology modification (Anti-Leaching / Spalling) and corrosion inhibition significantly reducing wear to equipment and concrete, saving trucks and deicing surface from damage.

PROTEK® Performance Deicer

OR CUSTOM MOBILE BLENDING

- Have your own bulk salt (and/or sand) supply and want to extend usage and increase performance? We have the mobile technology to treat your stockpiles professionally with the **PROTEK® PERFORMANCE** formula.
- Fresh customized mix designs translate into optimum performance. Eliminate the need for expensive onboard pre-wetting equipment and liquid storage. Easy delivery and set-up at the location of your choice.
- We have successfully worked with large Road Authorities, large and small salt supply operations to develop cost effective and efficient treating operations that significantly improve your overall **Salt Management Programs**.
